

# MEDICAL POLICY STATEMENT D-SNP

Policy Name & Number	Date Effective
Safety Beds-DSNP-MM-1454	08/01/2024
Policy Type	
MEDICAL	

Medical Policy Statement prepared by CareSource and its affiliates are derived from literature based on and supported by clinical guidelines, nationally recognized utilization and technology assessment guidelines, other medical management industry standards, and published MCO clinical policy guidelines. Medically necessary services include, but are not limited to, those health care services or supplies that are proper and necessary for the diagnosis or treatment of disease, illness, or injury and without which the patient can be expected to suffer prolonged, increased or new morbidity, impairment of function, dysfunction of a body organ or part, or significant pain and discomfort. These services meet the standards of good medical practice in the local area, are the lowest cost alternative, and are not provided mainly for the convenience of the member or provider. Medically necessary services also include those services defined in any Evidence of Coverage documents, Medical Policy Statements, Provider Manuals, Member Handbooks, and/or other policies and procedures.

Medical Policy Statements prepared by CareSource and its affiliates do not ensure an authorization or payment of services. Please refer to the plan contract (often referred to as the Evidence of Coverage) for the service(s) referenced in the Medical Policy Statement. If there is a conflict between the Medical Policy Statement and the plan contract (i.e., Evidence of Coverage), then the plan contract (i.e., Evidence of Coverage) will be the controlling document used to make the determination. According to the rules of Mental Health Parity Addiction Equity Act (MHPAEA), coverage for the diagnosis and treatment of a behavioral health disorder will not be subject to any limitations that are less favorable than the limitations that apply to medical conditions as covered under this policy.

A. Subject  
**Safety Beds**

B. Background

Healthy sleep requires adequate duration, appropriate timing, good quality, regularity, and the absence of sleep disturbances. The American Academy of Sleep Medicine has issued recommendations for sleep needs by age. An individual's bedtime environment is an important consideration, with factors such as the bed and mattress affecting the quality and duration of sleep.

A safety bed is an enclosed bed, typically fitted with a mesh canopy, padded walls, and/or a specially designed mattress. A provider may require safety beds for individuals with a variety of medical or behavioral health diagnoses, such as epilepsy, intracranial injury, hydrocephalus, intellectual disabilities, and autistic spectrum disorders. The use of these beds increases patient safety by eliminating falls, preventing injuries, and reducing wandering. In addition, safety beds might assist with treatments for other symptoms, such as aggression, impulsivity, noncompliance, or elopement behaviors. Ongoing individual evaluation and monitoring is recommended for appropriate use and prescribing.

C. Definitions

- **Crib Canopy** – A cover that attaches to the top of a crib that
