designing

- II. CareSource reserves the right to request documentation to support billing both services for all claims received. If documentation is requested, it must clearly delineate the problem-oriented history, exam, and decision making from those of the preventive service. Documentation must include the following:
- a. Key elements that support the additional preventive health services that were rendered
  - b. A separate history paragraph describing the chronic/acute condition that clearly supports additional work needed on the same date of service.
  - c. The provider should clearly list in the assessment portion of the documentation the acute/chronic conditions that are being managed at the time of the encounter. If there is a portion of the physical exam that is not routinely performed at the time of a preventive service, the provider should clearly identify those exam pieces (e.g., "A thorough MS and neuro exam of the left hip performed as it relates to the HPI").

#### E. Conditions of Coverage

Reimbursement is dependent on, but not limited to, submitting Centers for Medicare and Medicaid Services (CMS) approved HCPCS and CPT codes along with appropriate modifiers. Please refer to the CMS fee schedule for appropriate codes.

The following list(s) of codes is provided as a reference. This list may not be all
