

PHARMACY POLICY STATEMENT

Indiana Medicaid

DRUG NAME	Oncology Treatment Regimen Review
BILLING CODE	Must use valid NDC and/or HCPCS code(s)
BENEFIT TYPE	Medical or Pharmacy

All oncology treatments must be submitted to Eviti Connect for review via the [NantHealth Eviti Connect](#) portal. Eviti Connect is an online platform that connects CareSource with oncology offices for real-time validation of cancer treatment plans. It is the most efficient way to initiate a treatment plan review and reduces the administrative time involved in requesting authorizations at the drug level by assuring accurate reimbursement at the regimen level.

Oncology treatment regimens are reviewed in their entirety to include supportive care medications and drugs which otherwise would not require prior authorization (PA). Treatment plans that comply with evidence-based medicine will be issued an “Eviti code,” meaning that it meets national standards of quality care and the definition of medical necessity. An Eviti code is not an authorization number or guarantee of payment, however, it forwards the authorization request to CareSource for the review process to be completed.

For drugs which may have use in the oncology setting as well as other approved indications and which are not being used as a part of an oncology treatment regimen, review under this policy is not necessary. Any existing drug specific clinical review policies will supersede this oncology treatment regimen review policy.

Oncology treatment regimens are reviewed based on the following criteria:

If all the above requirements are met, the oncology treatment regimen will be authorized for up to 6 months.
