Ohio Medicaid

Policy Name & Number	Date Effective
Emergency Department Electrocardiogram (EKG/ECG) Interpretation and Imaging Interpretation-OH MCD-AD-1084	02/01/2024
Policy Type	
ADMINISTRATIVE	

Administrative Policy Statement prepared by CareSource and its affiliates are derived from literature based on and supported by clinical guidelines, nationally recognized utilization and technology assessment guidelines, other medical management industry

Provider Manuals, Member Handbooks, and/or other policies and procedures.

Administrative Policy Statements prepared by CareSource and its affiliates do not ensure an authorization or payment of services. Please refer to the plan contract (often referred to as the Evidence of Coverage) for the service(s) referenced in the Administrative Policy Statement. If there is a conflict between the Administrative Policy Statement and the plan contract (i.e., Evidence of Coverage), then the plan contract (i.e., Evidence of Coverage) will be the controlling document used to make the determination.

According to the rules of Mental Health Parity Addiction Equity Act (MHPAEA), coverage for the diagnosis and treatment of a behavioral health disorder will not be subject to any limitations that are less favorable than the limitations that apply to medical conditions as covered under this policy.

A. Subject

Electrocardiogram (EKG/ECG) Interpretation and Imaging Interpretation

B. Background

An electrocardiogram (EKG/ECG) is a non-invasive test that records the electrical activity of the heart. It is used when a possible cardiac issue occurs, due to an emergency medical condition. An EKG/ECG may need to be performed to address the situation quickly. The recording is reviewed by a physician who provides an interpretation and written report. An EKG/ECG may be reported as the technical aspect only, the interpretation and written report only, or both aspects together as one service. For the purpose of this policy, EKG will be used to represent both EKG and ECG.

C. Definitions

- **Electrocardiogram (EKG/ECG)** - A test that records the electrical activity of the heart.
- **Emergency Medical Condition** - A medical condition with sudden severity and onset that, in the absence of immediate medical attention, could place the patient's health in serious jeopardy, including labor and delivery, but not routine prenatal or postpartum care, or services related to an organ transplant procedure.
- **Imaging** - Several different technologies that are used to view the human body in order to diagnose, monitor, or treat medical conditions.

D. Policy

I. Electrocardiogram (EKG/ECG) Interpretation

- A. CareSource will reimburse the first EKG interpretation claim that is received for the member on the date of service.
 1. If another claim for the same EKG interpretation is received for reimbursement, CareSource will only reimburse the first claim received for the same member on the same date of service.
 2. CareSource will not reimburse for duplicate claims, for the same service on the same date of service for the same member, without the appropriate modifier.
- B. If a second EKG interpretation is medically necessary, on the same date of service, before the member is discharged, modifier 76 or modifier 77 must be appended to the second EKG interpretation for reimbursement.

II. Imaging Interpretation

- A. CareSource will reimburse the first imaging interpretation claim that is received for the member on the date of service.
 1. If another claim for the same imaging interpretation is received for reimbursement, CareSource will only reimburse the first claim received for the same member on the same date of service.

The ADMINISTRATIVE Policy Statement detailed above has received due consideration as defined in the ADMINISTRATIVE Policy Statement Policy and is approved.
